

# Caregiver Support

## THINK BEYOND THE PATIENT

Personalized 24/7 caregiver support that offers the perfect blend of technology and expert care advisers.

## Employees Need Expert Support

There are 53 million ignored family caregivers supporting loved ones with chronic conditions and functional impairments, costing 3 trillion dollars a year. Reduce unexpected employee time off and expenses with Caregiver Support, which reduces family members' need for hospitalizations and frequent doctor visits.

Caregivers are one of the most influential factors in a patient's success, yet most are untrained and unsupported. Explore a cost-effective, 24/7, personalized approach that uses both people and technology to support caregivers.

Reported reduced levels of stress while caring for loved ones

33%

Employees reported that they had financial concerns from caregiving

# How Caregiving Impacts the Workforce

## ONGOING EMPLOYEE BURDENS

The average duration of caregiving is 4 years, with 39% spending 5+ years providing care. Family caregivers spend approximately 24 hours per week providing care for a loved one.

## SUFFERING FROM CHRONIC STRESS

Of caregivers, 83% reported increased stress since the start of the pandemic and 46% of caregivers reported that they suffer from depression.

## EMPLOYEES EXITING THE WORKFORCE

Since the pandemic started, women have left the workforce at a pace more than four times faster than men (3 million women total).

## INCREASING NEED FOR CAREGIVING

There is an accelerating trend for aging at home, with 53 million unpaid caregivers for chronically ill adults recorded.

## Alleviating Employee Burdens

Caregiver Support is an online family caregiving service that connects caregivers with expert care advisors dedicated to helping them care for their loved ones.

Advisors are available 24/7 via mobile and video app to provide timely support to in-home care problems.
